The biggest
advantage
of any ERP System?

Everything
talks to
Everything!

The biggest
disadvantage
of any ERP System?

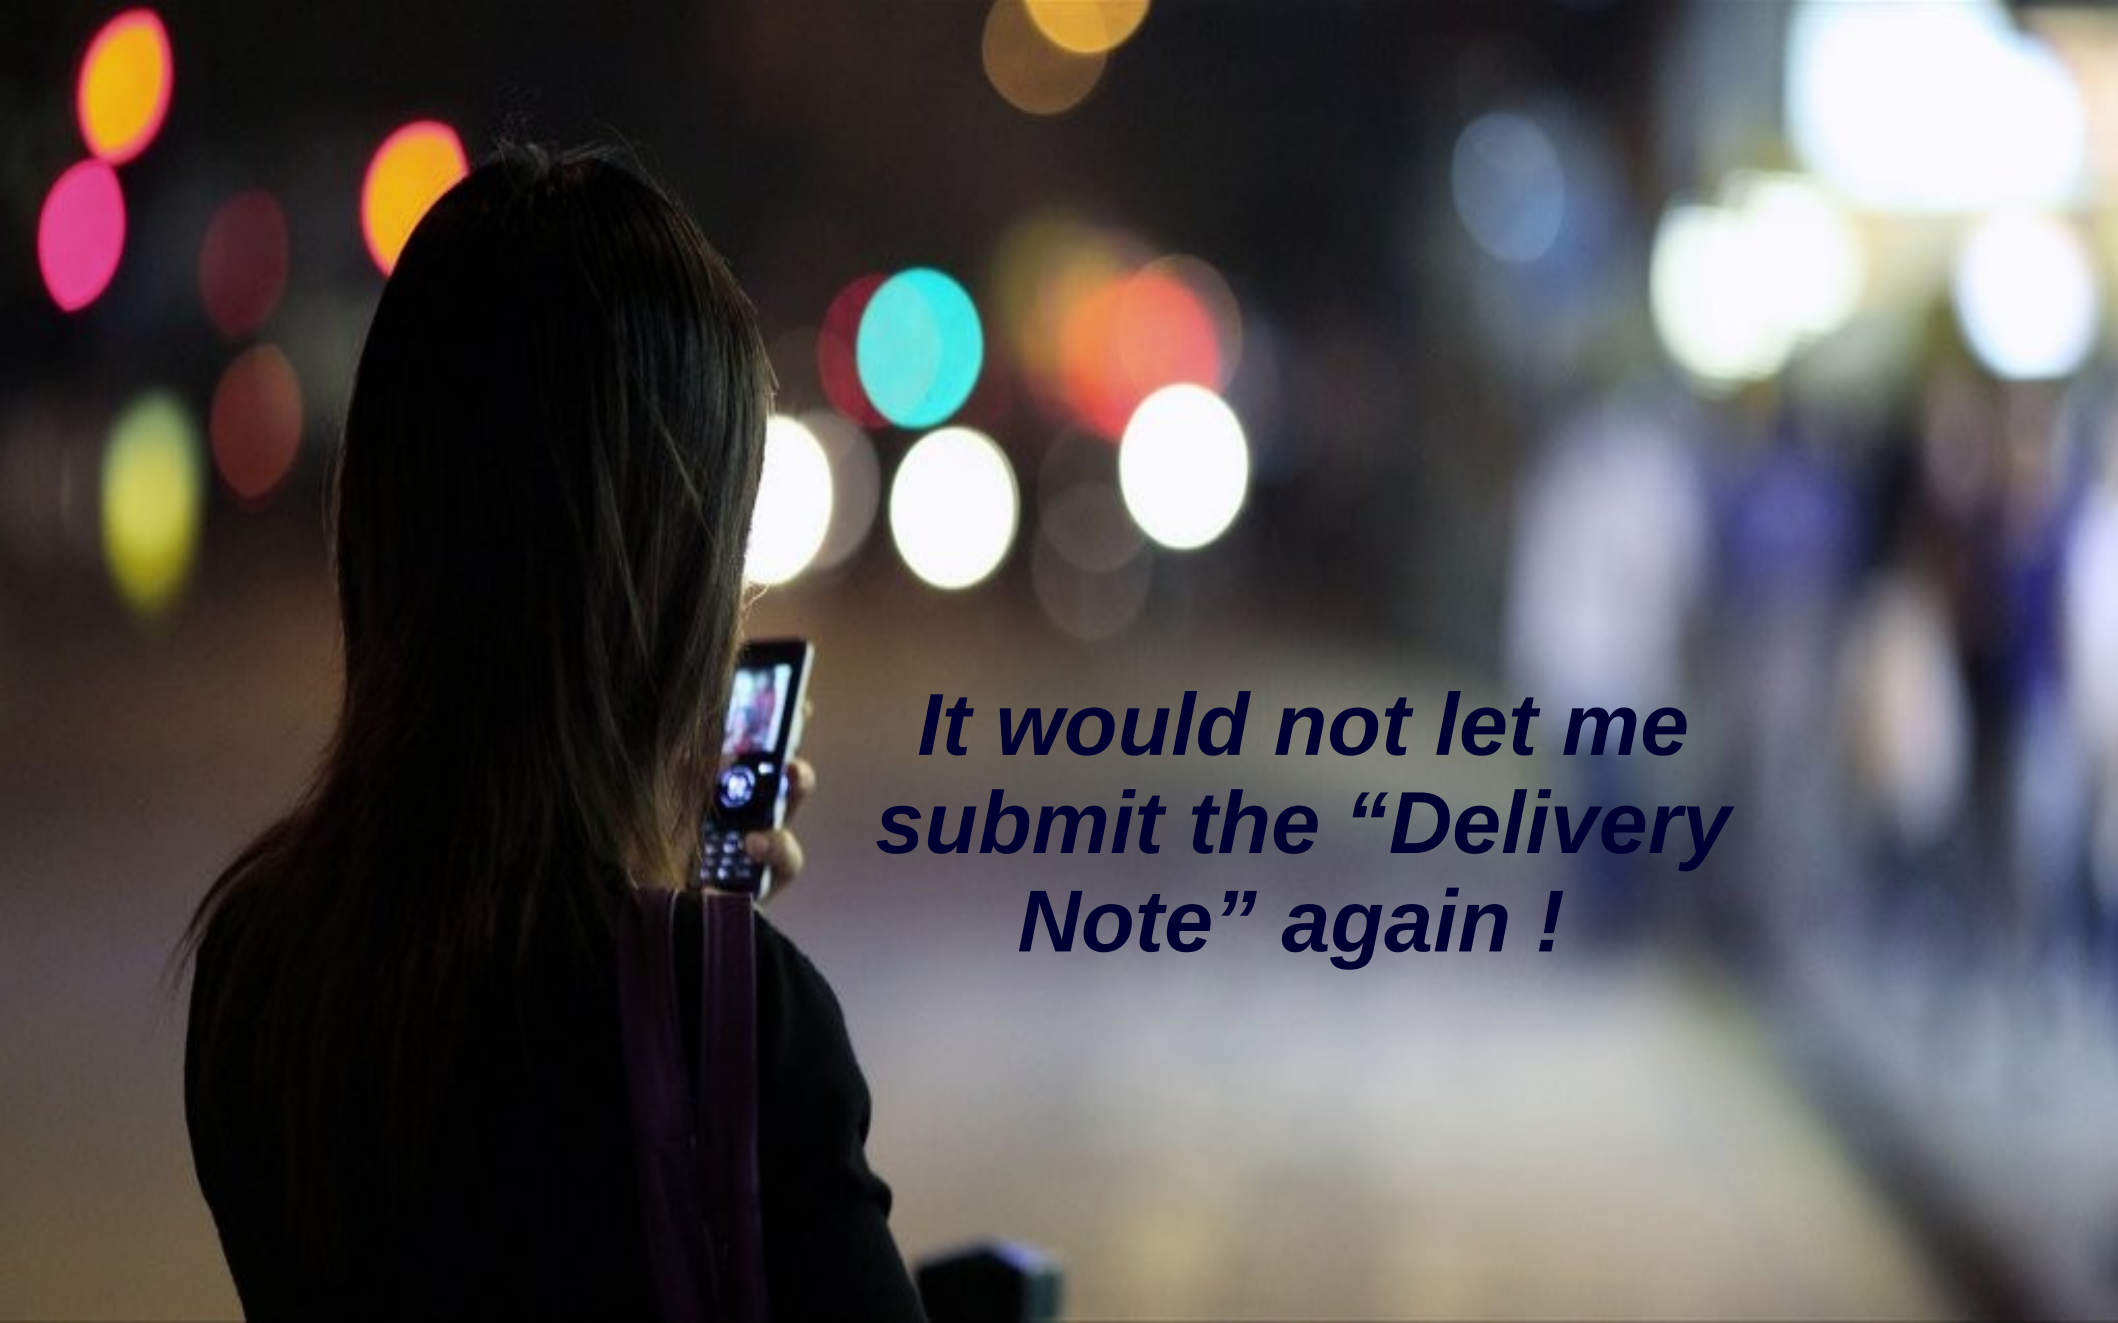

Everything
talks to
everything !

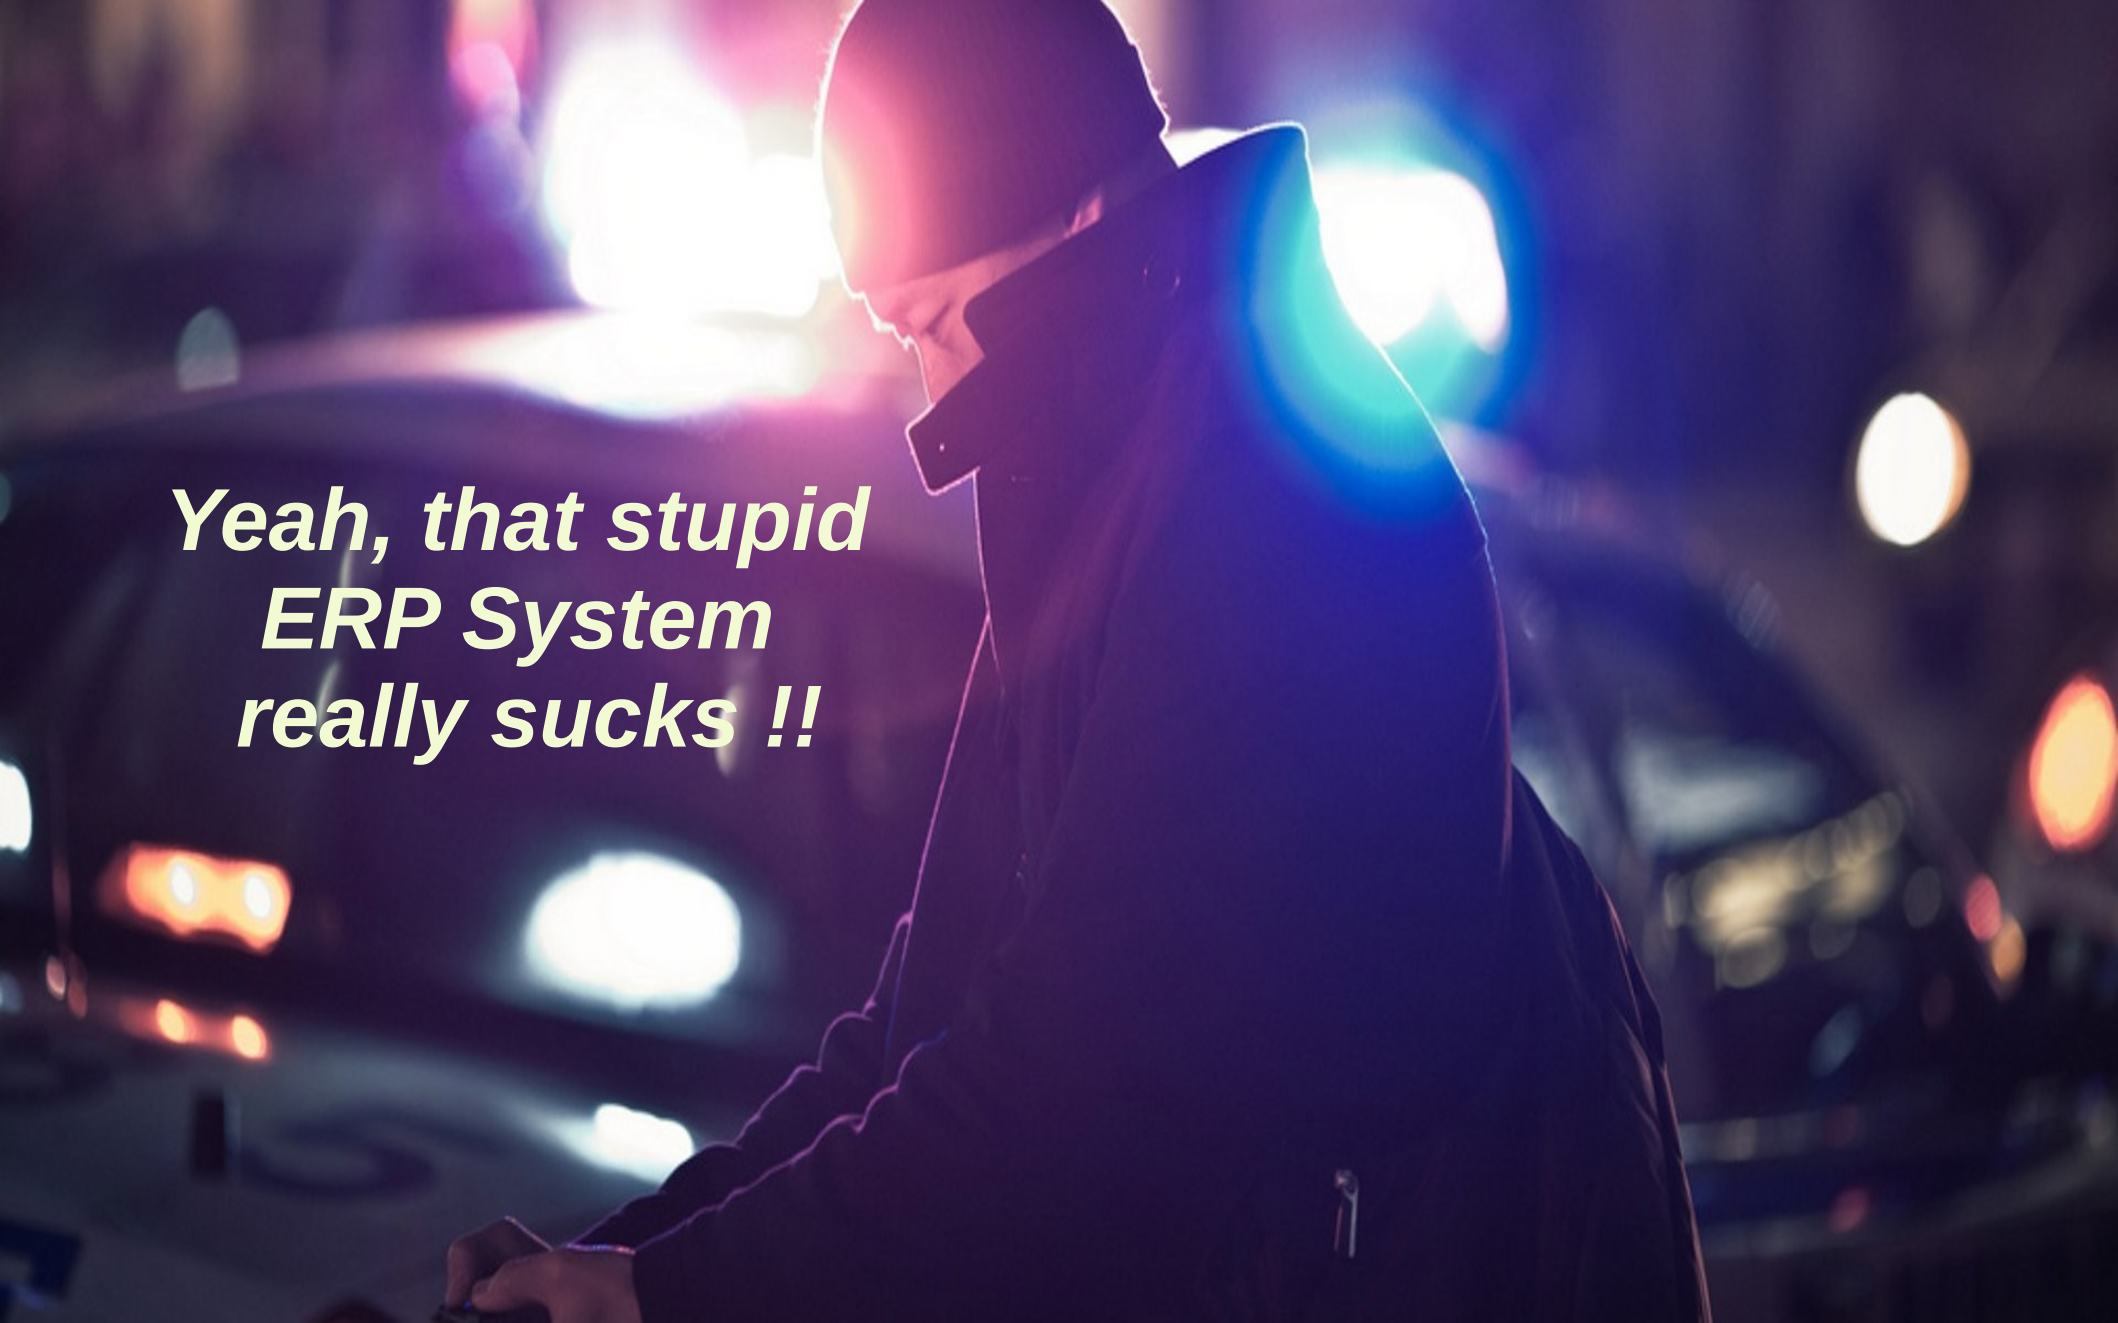

Everything

depends on

everything !

Can result in facing many cascading errors

It would not let me submit the “Delivery Note” again !

Yeah, that stupid
ERP System
really sucks !!

Many errors = user frustration

Many errors = user frustration

user frustration = **riot in the office**

Many errors = user frustration

user frustration = **riot in the office**

= **END OF ERP !**

Another Commercial Break !

"*Have you joined the* ***ERPNext Foundation*** *yet?*"

"*Sure thing Bro!* "

Here is **one way** to
Make life easier

(which hopefully will work for us)

Disconnect, if you can!

Practically …
cutting off **Warehousing**
at the beginning

Why **Warehousing** and not, let’s say, … **Accounting** ?

You **can** disconnect
Warehousing ...

… but you **can’t** disconnect **Accounting** … that’s why

An Example

> Sales Invoice

> Payment

> Delivery Note

Sales Order

> Sales Invoice

> Payment

> Delivery Note
